Active Membership: 138

Inductions last week

Welcome to our new Members

Thank you for a wonderful program last week

Mark Butler

Back to School Blitz was wonderful

Looks like a good time was had by all

Wine or Whine last night

Tomorrow evening, August 9th @ 5:30 pm

August Board Meeting, at the Plaza in the Back Room

This Week's Program

Dr. Brian Ring

EDUCATION & EXPERIENCE B.S. Biological Sciences, Florida State University Ph.D. Molecular Genetics, Florida State University Post-Doctoral Fellow, Functional Genomics, Novartis Pharmaceuticals Certified Forensic Biologist Technician, DNA & Serology, Florida Department of Law Enforcement Adjunct Professor, Florida A&M University Post-Doctoral Associate, Maize Cytogenetics, Florida State University Research in my lab involves molecular genetic techniques toward understanding how the vertebrate gonad develops. Primary sex determination in most vertebrates results in the development of a single gonad, ovary or testis, from a bipotential primordium, whose developmental fate is controlled by genetic or environmental mechanisms or a combination of both. For example, sex type is determined by sex chromosomes (genetics) in mammals (i.e. XY male in humans) or temperature in alligators (environmental). Regardless of mechanism, the predominant result is the formation of dimorphic individuals, either male or female, which have a testis or ovary, respectively.

Good Food, Fellowship & Insight

Fireside Chat is Tuesday, August 14th at Harry's Camp House

Please let Tom Callaway know if you are planning on attending.

Next Week's Program

Past District Fran Milberg

This is one you do not want to miss!
